

VACU-MAID®

CENTRAL VACUUM SYSTEMS

S-2600 Power Unit with DC-1200AC Dirt Canister.....

The Silent Partner® S-2600 is a split canister system. This two part system includes the motor, which is housed in a special foam-lined chamber that reduces motor noise coming from the unit power unit and a separate dirt canister, used for dirt collection and filtration. The split system allows you to hang the dirt canister in an easy-to-service area of your home, while locating the motor unit away from the living environment, such as a garage or basement. The S-2600 uses cyclonic filtration. Once dirt and debris is swept up, it goes into the dirt canister where it swirls around, separating the large debris from the small, allowing the large debris to fall to the bottom of the dirt can while the lighter dirt and dust is vented straight outside of your home. Vacu-Maid's cyclonic units also feature a patented Air Channel, which allows a plastic can liner to be used inside the dirt canister, making emptying the can less hassle and less mess. With the Air Channel, you eliminate clouds of dust billowing up in your face when you empty the dirt can. The S-2600 is constructed from rolled galvanized steel and powder coated for a tough, corrosion-resistant lifetime of use. As with all of our Vacu-Maid central vacuum systems, using the S-2600 can help decrease asthma and allergy symptoms by removing dust and allergens from your living areas. Vacuuming with these central vacuums provides a powerful, efficient cleaning job that will rid your home of these allergy-triggering irritants.

Silent Partner®

S-2600 Split Canister System	
MOTOR	Premier 7.2" Tangential By-Pass
VOLTAGE	120 A.C.
MAX AMPS	13.5
MAX AIR WATTS	525
AIRFLOW (CFM)	116
SEALED VACUUM (inches H ₂ O)	125
FILTRATION	Cyclonic
SOUND LEVEL	60 db
UP TO TOTAL SQ. FEET	7,500
DIRT CAPACITY	27 Qt.

Features & Benefits:

- Sound Reduced Power Unit--Foam lined motor compartment reduces motor noise.
- Muffler Kit--Muffler included for additional sound reduction.
- Cyclonic Filtration--Filter free cyclonic separation; no messy bags or filters.
- Patented Air Channel--Allows a plastic can liner to be used inside the dirt canister making emptying the can less hassle and less mess.

VSP1S/VSP2S CleanSweep ElectroKit

*VSP1S--Direct Connect, VSP2S--6 Ft. Pigtail Cord

The VSP1S/VSP2S Contains the Following Items:

GSH-630X	Tear-Drop Style 4-Wire Swivel Electric Crush Proof Hose-Stainless
EB-270NW	14" CleanSweep Electric Brush with Quietdrive
W-370T	Stainless Telescopic Top Wand
BW-275	Stainless Lower Wand
W-519H	Stainless Telescopic Ratchet Wand
FB-415BLK	12" Floor Brush
CT-630BLK	Premium Crevice Tool
DB-630BLK	Premium Dusting Brush
UT-630BBLK	Premium Upholstery Tool w/ Brush
H-431	Plastic Hose Hanger
CT-3BL	Clip-On Tool Caddy
CB-180	Mesh Tool Caddy Bag
WWH-1	Wall Mounted Wand Holder

PEK1/PEK2 Platinum ElectroKit

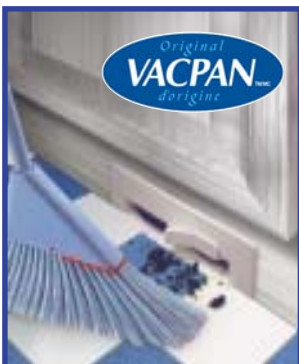

*PEK1--Direct Connect, PEK2--6 Ft. Pigtail Cord

The PEK1/PEK2 Contains the Following Items:

GSHT-630	Tear-Drop Style 4-Wire Swivel Electric Crush Proof Hose
EB-230	14" Electric Power Brush with 180° Swivel Neck
W-330T	Telescopic Cord Management Wand for EB230
W-319C	Black Aluminum Telescopic Ratchet Wand
FB-430W	14" Floor Brush with Wheels
CT-630BLK	Premium Crevice Tool
DB-630BLK	Premium Dusting Brush
UT-630BBLK	Premium Upholstery Tool w/ Brush
H-431	Plastic Hose Hanger
CT-3BL	Clip-On Tool Caddy
CB-180	Mesh Tool Caddy Bag
WWH-1	Wall Mounted Wand Holder

Sweep Inlets

The benefits of a central vacuum with the ease of a broom.

- With a floor level sweep inlet, you can get rid of your old dustpan and let your central vacuum do the work.
- Simple to use. Just open the valve with the flick of your toe, sweep the debris near the opening with a broom, and your central vacuum system will whisk it away.
- Eliminates bending over and stooping to pick up debris.
- Works well for residential or commercial applications.
- Great for kitchens, mudrooms, workshops, hair salons, retail stores, and any other hard surface high traffic areas where dirt accumulates quickly.
- Most often located in the kickplate below your cabinets, but can also be mounted into the baseboards or even on a workbench in the garage.

*Installation Required
